WORK EXPERIENCE

State Farm

Bloomington, IL

Operations Consulting Intern

May 2025 – Aug. 2025

- Conducted quantitative risk and performance analyses in Excel, tracked KPIs to identify operational inefficiencies, and optimized resource allocation to support process improvement decisions
- Built process maps and dashboards with project management tools to support decision-making and reduce lead times
- Generated strategic recommendations for cross-functional teams through qualitative research and data-driven modeling, lowering costs by \$547,350

Cornell University Press

Ithaca, NY

Metadata Analyst Intern

Aug. 2024 – May 2025

- Cleaned, organized, and interpreted datasets for 750+ publications, improving metadata accuracy and online visibility
- Partnered with the Marketing team to design processes for more efficient dataset handling, enhancing accessibility for customers and enabling better insights for digital strategy

Cornell University Department of Mathematics

Ithaca, NY

Calculus Teaching Assistant

Aug. 2024 – Dec. 2024

- Hosted weekly office hours for 50+ students, graded homework assignments, and provided structured feedback for Cornell's advanced calculus course
- Facilitated group problem-solving to promote a deeper understanding of course concepts and built a collaborative learning environment for students from diverse backgrounds

ACTIVITIES

Scholars of Finance

Ithaca, NY

Financial Analyst

Feb. 2024 – Present

- Conducted financial modeling, company valuations, and market research for fintech and healthcare companies
- Delivered investment presentations to professionals, fostering analytical discussions on emerging trends in fintech, banking, and AI industries

Cornell Global Research and Consulting

Ithaca, NY

Business Analyst & Project Lead

Feb. 2024 – Present

- Led a 6-person team to advise international MedTech startup Meticuly on market expansion strategies by performing research and creating an Excel dashboard with 30+ potential partners
- Designed research frameworks and trend analyses for nonprofit clients, improving outreach efficiency and long-term growth strategies

Google Data Analytics Program

Remote

Learner

Aug. 2025

- Applied data cleaning and visualization techniques in SQL and R to extract insights from 20+ datasets
- Completed project on NYC rent price trends, assessing economic and housing market factors driving rental affordability
